Analysis prepared by Catherine Seifert on May 06, 2022 11:05 AM, when the stock traded at **USD 125.38**.

Highlights

- ▶ We forecast revenue growth of between 3% and 6% in 2022 and between 5% and 8% in 2023. Revenue growth of 23.6% in 2021 topped our forecast of 16% to 22% growth, and reflected a 24.7% rise in investment advisory fees [TROW's primary revenue source], amid a recovery in asset values, partly offset by net asset outflows. Assets under management (AUM) of \$1.55 trillion as of March 31, 2022 declined by 8.3% from December 31, 2021 AUM of \$1.69 trillion, reflecting \$130.3 billion of market depreciation and \$5.3 billion of client net outflows. Net outflows of \$35 billion in 2021 included \$28.7 billion in Q4.
- ▶ We expect operating margin trends to remain stable and at the upper end of peer ranges in 2022 and 2023. Operating margins widened in 2021 (to 48.4% from 44.2%) as the relatively favorable revenue trends in 2021 outpaced the 14.5% rise in operating expenses [paced by higher compensation costs]. We expect TROW to allocate around \$150 million in 2022 for capital expenditures, most of which we expect to be earmarked for technology initiatives.
- ▶ We see EPS of \$11.17 in 2022, rising to \$12.50 in 2023, assuming a modest [3% to 5%] annual share reduction amid buybacks.

Investment Rationale/Risk

- ▶ We lowered our opinion on the shares to Hold from Buy after second quarter 2021 fund flow trends appeared to deteriorate, a trend that continued throughout 2021 and into 2022's Q1. Weighing the mixed relative performance of TROW's mutual funds and the favorable market position of TROW's target-date retirement funds with TROW's exposure to actively managed equity funds, we think the shares are fairly valued, given some mixed near-term fund flow trends amid pressure from lower-cost passive investments.
- ▶ Risks to our recommendation and target price include rising bond yields, further strengthening of the U.S. dollar, below-average relative fund performance, and increased competition from passively managed funds and ETFs.
- ▶ Our 12-month target price of \$140 is 12.5x our 2022 EPS estimate and 11.2x our 2023 EPS estimate, versus TROW's three-year average forward multiple of 14.7x and the peer group average of 12.2x. At current levels, we view the shares as fairly valued versus peer and historical levels, given weak fund flows trends [2021 outflows totaled \$35 billion] amid secular pressure on actively managed funds. The shares currently yield 3.8%, adding to potential total return.

Analyst's Risk Assessment

LOW MEDIUM HIGH

Our risk assessment reflects our view of the company's strong market share, and relatively better-than-average investment performance, offset by regulatory change risk, industry cyclicality, mixed fund flow trends, and a secular shift to passive investment vehicles (like index ETFs). We view TROW's ability to introduce non-transparent ETFs [pursuant to a November 14, 2019 SEC decision] as a long-term positive for the firm from both a strategic and competitive standpoint.

T. Rowe Price Group, Inc.**Business Summary** Feb 08, 2022

CORPORATE OVERVIEW. T. Rowe Price Group is the successor to an investment counseling business formed by Thomas Rowe Price, Jr. in 1937. It is now the investment adviser to the T. Rowe Price family of no-load mutual funds, and is one of the largest publicly held U.S. mutual fund complexes.

T. Rowe Price offers mutual funds and separate accounts that employ a broad range of investment styles, including growth, value, sector-focused, tax-efficient, and quantitative index-oriented approaches. The company's investment approach is based upon a commitment to proprietary research, sophisticated risk management processes, and a strict adherence to stated investment objectives. The company employs both fundamental and quantitative methods in performing security analysis, using internal equity and fixed income investment research capabilities. We believe T. Rowe Price's broad line of no-load mutual funds makes it easy for investors to reallocate assets among funds (which is not the case at some smaller fund companies), contributing to increased client retention.

All of the company's Investor class funds are sold without a sales commission, known as no-load funds. Its Advisors and R class funds, distributed through third-party financial intermediaries, carry 12b-1 fees to cover distribution costs. The company also manages private accounts for individuals and institutions. Revenues primarily come from investment advisory fees for managing portfolios, which depend largely on the total value and composition of assets under management.

IMPACT OF MAJOR DEVELOPMENTS. In January 2020, TROW announced that it filed registration statements with the SEC to offer four strategies of semi-transparent exchange traded funds (ETFs) - a Blue Chip Growth, Growth Stock, Dividend Growth, and an Equity Income product. TROW said in early July 2020 it received all the regulatory approvals necessary and that it planned to launch these funds in August 2020. The Securities and Exchange Commission (SEC) granted preliminary exemptive relief to TROW in mid-November 2019, paving the way for the creation and rollout of these ETF products that employ TROW's actively managed approach. The SEC approved the formation of semi-transparent exchange traded funds (ETFs) in mid-April 2019, essentially giving investors access to an actively managed account within an ETF format. We view this as a positive development and one that should enhance TROW's already strong competitive position, long term.

CORPORATE STRATEGY. We expect the company to continue to conservatively and opportunistically grow its business by investing in people and systems. From a product perspective, we look for the company to emphasize its retirement date funds, which have seen strong inflows in recent years, but continue to avoid hedge fund and private equity offerings. We estimate that about two-thirds of the company's assets under management are retirement-related, which we think have a high retention rate. We expect the company to grow its third-party distribution platform. We also see TROW continuing to expand globally, having opened new offices in Sweden, Australia, and Dubai. International clients account for less than 10% of assets under management; this is an area that the company is focused on growing. The company sub-advises investment assets for Daiwa SB Investments in Japan, in which TROW holds a 10% interest. Also, in 2010, the company completed the purchase of a 26% equity interest in the Indian firm UTI Asset Management Company and an affiliate.

FINANCIAL TRENDS. During the five years ended December 31, 2021, TROW increased its revenue at a compound annual growth rate (CAGR) of 12.7%, as fee pressures were partly offset by growth in assets under management (AUM). During this same period, AUM grew at a CAGR of 15.8%. Operating profits grew at a CAGR of 15.6% during the five years ended December 31, 2021.

AUM of \$1,687.8 billion at December 31, 2021 rose \$217.3 billion from year-end 2020 AUM of \$1470.5 billion, reflecting net outflows of \$35 billion, market appreciation of \$205.4 billion, and the acquisition of \$46.9 billion of AUM. Equity and blended asset mutual funds accounted for 60% of year-end 2021 AUM, while fixed income and money market funds accounted for 10%, and multi-asset funds for the remaining 30% of year-end 2021 AUM.

T. Rowe Price Group, Inc.

Sub-Industry Outlook

We have a neutral fundamental outlook for the asset management and custody banks sub-industry. We think the long-term outlook is relatively healthy due to aging populations and a fairly broad-based global economic recovery expected in the aftermath of the Covid-19 induced recession, despite the potential for some near-term volatility as the conflict in Ukraine continues. Demographic trends remain favorable, as millennials come of age and baby boomers play "catch-up" with contributions to IRAs, driving a significant increase in retirement investments, in our view. Millennials are also maturing and beginning to save for retirement. We see upside potential for asset managers with solid reputations, better-than-average fund performance, and strong management. Many of the companies in this sub-industry will also benefit from recently enacted legislative initiatives designed to encourage saving for retirement.

These positive longer-term factors are offset by some structural and secular changes within the industry, including a shift in investor preferences to ETFs and away from actively managed assets. Near-term market volatility will also impact many equity funds. Within this relatively broad-based sub-industry classification are companies engaged in asset management, trust and processing, and private equity activities. Each of these different entities' business models are influenced to varying degrees by changes in interest rates and by an array of industry-specific competitive dynamics. Within the asset management industry, there are some negative factors pressuring many firms. An ongoing shift out of active equity investments and into passive and fixed income investments has exerted downward pressure on fee revenues for most firms.

Growth in assets under management is a key driver for many firms in this industry. However, it's important to differentiate between asset growth due to positive fund flow trends and asset growth due to market appreciation. AUM levels for most firms increased year to date in 2021 amid a

recovery of most asset values. However, fund flow trends varied by firm, with actively managed equity funds seeing the most dramatic outflows. Our 2022 projection is for high-single-digit AUM growth, though near-term market volatility amid shifting sector allocations will likely keep AUM levels under pressure. A negative trend that continues to linger is AUM growth that does not directly translate to a similar rate of revenue growth due to increasing amounts of AUM flowing into lower revenue-producing, passively-managed assets.

At year end 2021, assets in all worldwide open-end funds totaled \$71.1 trillion, up 13% from \$63 trillion at year end 2020. Equity assets (which rose 19% in 2021, to \$33.6 trillion) equaled 47% of total fund assets. Bond funds (which rose 4.6% in 2021, to \$13.7 trillion) accounted for 19% of total fund assets. Money market accounts (which increased by 6.0%, to \$8.8 trillion) represented 12% of total assets, and other funds (including real estate and balanced funds, equaled \$15.6 trillion, or 22% of total fund assets at year end 2021.

A rebound in asset values amid an economic recovery propelled the S&P Asset Management & Custody Banks Index up by 31.9% during 2021, versus a 26.7% rise in the S&P 1500 Index. Year to date through March 18, 2022, the sub-industry index declined by 13.5%, while the S&P 1500 Index declined by 6.2%.

T. Rowe Price Group, Inc.**Analyst Research Notes and other Company News****April 28, 2022**

02:03 PM ET... CFRA Keeps Hold Opinion on Shares of T. Rowe Price Group [TROW 130.27***]:

We cut our 12-month target price by \$25 to \$140, or 11.2x our 2023 EPS estimate of \$12.50 [cut by \$1.60 today] versus TROW's three-year average forward multiple of 14.7x and a peer average of 12.2x. We also cut our 2022 EPS estimate by \$1.88 to \$11.17 after Q1 EPS of \$2.62 versus \$3.01 lagged our \$3.15 EPS estimate, the \$2.76 consensus forecast on 2% revenue growth [shy of our 8%-12% forecast] and a compression in operating margins, to 47.1% from 48.9% [still above peers]. We lower our 2022 revenue growth forecast to 3%-6%. While we expect money market fee waivers, which totaled \$9.2M in Q1, to end by Q3, our view remains tempered by Q1 net fund outflows of \$5.3B, as \$12.8B of inflows into fixed income and alternatives were offset by equity outflows of \$18.1B. Weighing TROW's above peer margins and shares' current valuation discount versus peer and historical averages, we think the shares [currently yielding 3.7%] are worth holding, but we would not add to positions amid weak fund flow trends. / Catherine Seifert

January 28, 2022

12:03 AM ET... CFRA Keeps Hold Opinion on Shares of T. Rowe Price Group, Inc. [TROW 149.85***]:

We cut our 12-month target price by \$55 to \$165, or 12.6x our 2022 EPS estimate of \$13.05 [cut today by \$0.20] and 11.7x our 2023 EPS estimate of \$14.10 [lowered by \$0.05], below TROW's 10-year average forward multiple of 16.2x [amid eroding organic growth trends] and closer to the peer average of 12.2x. Q4 EPS of \$3.17 versus \$2.89 compared to our \$3.12 EPS estimate, the \$3.13 consensus forecast on 13% higher revenues, and 14.7% higher expenses. Full year 2021 EPS of \$12.75 versus \$9.58 [compared to our EPS estimate and the consensus forecast of \$12.71] reflected 23.6% higher revenues [above our 16% to 22% growth forecast] and 34% higher operating profits. But, net asset outflows in 2021 were \$28.5B, of which \$22.7B occurred in Q4. We are cutting our 2022 revenue forecast to a rise of 8%-12% [from 12%-15% growth] and see a rise of 5%-8% in 2023. We acknowledge TROW's strong balance sheet and top-tier distribution platform, but think the magnitude of Q4 net outflows remove a catalyst from the shares. / Catherine Seifert

October 28, 2021

03:52 PM ET... CFRA Keeps Hold Opinion on Shares of T. Rowe Price Group, Inc. [TROW 213.99***]:

We raise our 12-month target price by \$13, to \$220, or 15.5x our 2023 operating EPS estimate of \$14.15 [upped by \$0.10] and 16.6x our 2022 EPS estimate of \$13.25 [lifted by \$0.05], versus TROW's three year average forward multiple of 14.8x and a peer average of 15.2x. We lift our 2021 EPS estimate by \$0.17, to \$12.71, after TROW reported Q3 EPS of \$3.27 versus \$2.55, versus our \$3.10 EPS estimate, the \$3.31 consensus forecast, on 23% higher revenues and wider margins that led to a 305 rise in operating profits. We applaud these results, and see 16% to 22% revenue growth in 2021. We also applaud TROW's plan to acquire alternative credit manager Oak Hill Advisors (\$53B AUM) for \$4.2B in a deal that diversifies TROW's AUM mix. But, our view remains tempered by a deterioration in fund flow trends that began in Q2 and accelerated in Q3, with \$6.4B of net outflows. Currently trading at 16.8x our 2021 EPS estimate [and yielding 2.0%], a premium to peer and historical averages, we view the shares as fairly valued. / Catherine Seifert

July 30, 2021

02:23 PM ET... CFRA Lowers Opinion on Shares of T. Rowe Price Group, Inc. to Hold from Buy [TROW 204.47***]:

We raise our 12-month target price by \$7, to \$207, or 14.7x our newly initiated 2023 operating EPS estimate of \$14.05 and 15.7x our 2022 EPS estimate of \$13.20 [raised by \$0.30], versus the shares' one year average forward multiple of 14.7x. We lift our 2021 operating EPS estimate by \$0.29, to \$12.54, after Q2 EPS of \$3.31 versus \$2.29 topped our \$3.02 EPS estimate, the \$3.20 consensus forecast on 36% revenue growth amid 33% growth in assets under management [AUM], to \$1.6 trillion at June 30th. While a recovery in asset values drove the year to year growth in AUM and revenues, our view is tempered by the \$600M in net outflows during the quarter, including \$8.1B from TROW's core mutual funds. We continue to view TROW as a top tier asset manager with an above-peer technology and distribution platform. But, TROW shares, which have risen nearly 39% YTD and are currently trading at 16.3x our 2021 operating EPS estimate, appear fairly valued and lack a near term catalyst amid an erosion in fund flow trends. / Catherine Seifert

April 29, 2021

04:37 PM ET... CFRA Keeps Buy Recommendation on Shares of T. Rowe Price Group, Inc. [TROW 181.82***]:

We raise our 12-month target by \$10, to \$200, or 16.3x our 2021 operating EPS estimate of \$12.25 [increased by \$0.75] and 15.5x our 2022 operating EPS estimate of \$12.90 [lifted by \$0.40], versus the shares' 10-year average forward multiple of 16.3x and a peer average of 16.4x. Q1 EPS of \$3.01 versus \$1.87 topped our \$2.75 EPS estimate and the \$2.94 consensus forecast on 25% higher revenues amid a 27% rise in core fee revenues, as assets under management [AUM] surged 52%, to \$1.52 trillion. We raise our revenue growth forecast for 2021 to 12% to 16% [from 10% to 14%] on favorable inflow and revenue growth trends [albeit not at Q1's run rate]. We also applaud steps TROW has taken to contain operating costs [which rose by 23.6% Y/Y but declined 4.4% sequentially] while it maintains a best-in-class technology platform and expands its product suite and geographic reach. Trading at 14.8x our 2021 EPS estimate, the shares [currently yielding 2.4%] are undervalued versus peer and historical averages, in our view. / Catherine Seifert

January 28, 2021

01:09 PM ET... CFRA Keeps Buy Opinion on Shares of T. Rowe Price Group, Inc. [TROW 163.84***]:

We raise our 12-month target price by \$40, to \$190, or 16.5x our 2021 EPS estimate of \$11.50 [raised today by \$1.45] and 15.2x our 2022 EPS estimate of \$12.50 [also raised today by \$1.75], in line with TROW's 10-year average forward multiple of 16.5x and above the peer average of 14.4x, reflecting TROW's above-peer rate of growth and wider operating margins. Q4 EPS of \$3.33 versus \$2.24 topped our \$2.40 EPS estimate and the \$2.88 consensus forecast, on 18% higher revenues amid 22% growth in assets under management [to \$1.47 trillion at year end] that included \$2.2 billion of net inflows and wider operating margins of 43.6% versus 39.5%. Full-year EPS of \$9.98 versus \$8.70 topped our \$9.09 EPS estimate, the \$9.50 consensus forecast on 10.5% higher revenues [versus our 5%-9% forecast] and operating margins of 44.2% versus 42.5%. We see 10%-14% revenue growth in 2021 and a rise of 7%-10% in 2022 and operating margins of 44%-plus supporting the shares' above-peer valuation. The shares also currently yield 2.2%. / Catherine Seifert

November 02, 2020

11:42 AM ET... CFRA Keeps Buy Opinion on Shares of T. Rowe Price Group, Inc. [TROW 126.66***]:

We trim our 12-month target price by \$3 to \$150, or 14.9x our 2021 EPS estimate of \$10.05 [raised today by \$0.70] and 14x our newly initiated 2022 EPS estimate of \$10.75 versus TROW's five-year average forward multiple of 15.2x and a peer average of 13.4x. We raise our 2020 EPS estimate by \$0.63 to \$9.09 and our Q4 EPS estimate by \$0.21 to \$2.40. Q3 EPS of \$2.73 versus \$2.23 topped our \$2.31 EPS estimate and the \$2.52 consensus forecast on 11.9% revenue growth [versus our forecast of 3%-6% growth]. Nine-month revenues grew by 7.8%. We now see 5% to 8% revenue growth in 2020 and gains of 6% to 9% in 2021. We consider TROW a best in class asset manager, but our view is tempered by Q3 net outflows of \$5.3B [on \$1.3 trillion of invested assets] amid secular pressures in active equity management that we see TROW countering with strong fund performance and actively managed ETFs. Currently trading at 12.9x our 2021 EPS estimate and yielding 2.8%, we view the shares as undervalued versus peer and historical levels. / Catherine Seifert

Forecasts are not reliable indicator of future performance.

Note: A company's earnings outlook plays a major part in any investment decision. S&P Global Market Intelligence organizes the earnings estimates of over 2,300 Wall Street analysts, and provides their consensus of earnings over the next two years, as well as how those earnings estimates have changed over time. Note that the information provided in relation to consensus estimates is not intended to predict actual results and should not be taken as a reliable indicator of future performance.

Note: For all tables, graphs and charts in this report that do not cite any reference or source, the source is S&P Global Market Intelligence.

Glossary

STARS

Since January 1, 1987, CFRA Equity and Fund Research Services, and its predecessor S&P Capital IQ Equity Research has ranked a universe of U.S. common stocks, ADRs [American Depositary Receipts], and ADSs [American Depositary Shares] based on a given equity's potential for future performance. Similarly, we have ranked Asian and European equities since June 30, 2002. Under proprietary STARS (Stock Appreciation Ranking System), equity analysts rank equities according to their individual forecast of an equity's future total return potential versus the expected total return of a relevant benchmark [e.g., a regional index (MSCI AC Asia Pacific Index, MSCI AC Europe Index or S&P 500® Index)], based on a 12-month time horizon. STARS was designed to help investors looking to put their investment decisions in perspective. Data used to assist in determining the STARS ranking may be the result of the analyst's own models as well as internal proprietary models resulting from dynamic data inputs.

S&P Global Market Intelligence's Quality Ranking

[also known as **S&P Capital IQ Earnings & Dividend Rankings**] - Growth and S&P Capital IQ Earnings & Dividend Rankings stability of earnings and dividends are deemed key elements in establishing S&P Global Market Intelligence's earnings and dividend rankings for common stocks, which are designed to capsize the nature of this record in a single symbol. It should be noted, however, that the process also takes into consideration certain adjustments and modifications deemed desirable in establishing such rankings. The final score for each stock is measured against a scoring matrix determined by analysis of the scores of a large and representative sample of stocks. The range of scores in the array of this sample has been aligned with the following ladder of rankings:

A+	Highest	B	Below Average
A	High	B-	Lower
A	Above	C	Lowest
B+	Average	D	In Reorganization
NC	Not Ranked		

EPS Estimates

CFRA's earnings per share (EPS) estimates reflect analyst projections of future EPS from continuing operations, and generally exclude various items that are viewed as special, non-recurring, or extraordinary. Also, EPS estimates reflect either forecasts of equity analysts; or, the consensus [average] EPS estimate, which are independently compiled by S&P Global Market Intelligence, a data provider to CFRA. Among the items typically excluded from EPS estimates are asset sale gains; impairment, restructuring or merger-related charges; legal and insurance settlements; in process research and development expenses; gains or losses on the extinguishment of debt; the cumulative effect of accounting changes; and earnings related to operations that have been classified by the company as discontinued. The inclusion of some items, such as stock option expense and recurring types of other charges, may vary, and depend on such factors as industry practice, analyst judgment, and the extent to which some types of data is disclosed by companies.

12-Month Target Price

The equity analyst's projection of the market price a given security will command 12 months hence, based on a combination of intrinsic, relative, and private market valuation metrics, including Fair Value.

Abbreviations Used in Equity Research Reports

CAGR	- Compound Annual Growth Rate
CAPEX	- Capital Expenditures
CY	- Calendar Year
DCF	- Discounted Cash Flow
DDM	- Dividend Discount Model
EBIT	- Earnings Before Interest and Taxes
EBITDA	- Earnings Before Interest, Taxes, Depreciation & Amortization
EPS	- Earnings Per Share
EV	- Enterprise Value
FCF	- Free Cash Flow
FFO	- Funds From Operations
FY	- Fiscal Year
P/E	- Price/Earnings
P/NAV	- Price to Net Asset Value
PEG Ratio	- P/E-to-Growth Ratio
PV	- Present Value
R&D	- Research & Development
ROCE	- Return on Capital Employed
ROE	- Return on Equity
ROI	- Return on Investment
ROIC	- Return on Invested Capital
ROA	- Return on Assets
SG&A	- Selling, General & Administrative Expenses
SOTP	- Sum-of-The-Parts
WACC	- Weighted Average Cost of Capital

Dividends on American Depositary Receipts (ADRs) and American Depositary Shares (ADSs) are net of taxes (paid in the country of origin).

Qualitative Risk Assessment

Reflects an equity analyst's view of a given company's operational risk, or the risk of a firm's ability to continue as an ongoing concern. The Qualitative Risk Assessment is a relative ranking to the U.S. STARS universe, and should be reflective of risk factors related to a company's operations, as opposed to risk and volatility measures associated with share prices. For an ETF this reflects on a capitalization-weighted basis, the average qualitative risk assessment assigned to holdings of the fund.

STARS Ranking system and definition:

★★★★★ 5-STARS (Strong Buy):

Total return is expected to outperform the total return of a relevant benchmark, by a notable margin over the coming 12 months, with shares rising in price on an absolute basis.

★★★★ 4-STARS (Buy):

Total return is expected to outperform the total return of a relevant benchmark over the coming 12 months.

★★★ 3-STARS (Hold):

Total return is expected to closely approximate the total return of a relevant benchmark over the coming 12 months.

★★★ 2-STARS (Sell):

Total return is expected to underperform the total return of a relevant benchmark over the coming 12 months.

★★★ 1-STAR (Strong Sell):

Total return is expected to underperform the total return of a relevant benchmark by a notable margin over the coming 12 months, with shares falling in price on an absolute basis.

Relevant benchmarks:

In North America, the relevant benchmark is the S&P 500 Index, in Europe and in Asia, the relevant benchmarks are the MSCI AC Europe Index and the MSCI AC Asia Pacific Index, respectively.

T. Rowe Price Group, Inc.

Disclosures

Stocks are ranked in accordance with the following ranking methodologies:

STARS Stock Reports:

Qualitative STARS rankings are determined and assigned by equity analysts. For reports containing STARS rankings refer to the Glossary section of the report for detailed methodology and the definition of STARS rankings.

Quantitative Stock Reports:

Quantitative rankings are determined by ranking a universe of common stocks based on 5 measures or model categories: Valuation, Quality, Growth, Street Sentiment, and Price Momentum. In the U.S., a sixth sub-category for Financial Health will also be displayed. Percentile scores are used to compare each company to all other companies in the same universe for each model category. The five (six) model category scores are then weighted and rolled up into a single percentile ranking for that company. For reports containing quantitative rankings refer to the Glossary section of the report for detailed methodology and the definition of Quantitative rankings.

STARS Stock Reports and Quantitative Stock Reports:

The methodologies used in STARS Stock Reports and Quantitative Stock Reports (collectively, the "Research Reports") reflect different criteria, assumptions and analytical methods and may have differing rankings. The methodologies and data used to generate the different types of Research Reports are believed by the author and distributor reasonable and appropriate. Generally, CFRA does not generate reports with different ranking methodologies for the same issuer. However, in the event that different methodologies or data are used on the analysis of an issuer, the methodologies may lead to different views on the issuer, which may at times result in contradicting assessments of an issuer. CFRA reserves the right to alter, replace or vary models, methodologies or assumptions from time to time and without notice to clients.

STARS Stock Reports:

Global STARS Distribution as of February 08, 2022

Ranking	North America	Europe	Asia	Global
Buy	43.8%	46.2%	40.0%	43.4%
