**Highlights**

- **We expect 2018 revenues to rise about 5.7% on aggregate higher U.S., European, Japanese, and Korean mirror sales. We expect revenues to advance on greater penetration, even as U.S. and European production should be flat, along with a Japan and Korea production decline. The company revenues are likely to outpace global industry production volume, helped by increased content per vehicle and greater market share in the Asian markets. Fire protection revenues likely will not change meaningfully. We expect growth in dimmable airplane windows, albeit from a tiny but expanding base, as production of the Boeing 787 Dreamliner increases. We expect 7% to 8% revenue growth in 2019.**

- **We project narrower operating margins for 2018, as price reductions, unfavorable currency, and the impact of initial tariffs outweigh cost cutting and operating leverage. Contributions to other income from realized equity gains should rise this year.**

- **We see GNTX benefiting from federal tax rate policy changes. We expect EPS of $1.67 in 2018, up from $1.41 in 2017, which included $0.13 of benefit from the Tax Cuts and Jobs Act of 2017. GNTX’s strategy for growth includes adding features to interior and exterior auto mirrors.**

**Analysis prepared by Equity Analyst Garrett Nelson on Aug 30, 2018 08:12 AM, when the stock traded at $23.93.**

**Investment Rationale/Risk**

- **GNTX recently traded at a premium to the peer average based on 2018 EPS estimates, but at a discount to the S&P MidCap 400 Index. We think a premium to peers is warranted by GNTX’s historical ability to generate more consistent growth than peers, and also given the U.S. Department of Transportation’s rules regarding expanding the required field of view to detect objects directly behind vehicles.**

- **Risks to our recommendation and target price include lower production or demand for vehicles, especially those with relatively high GNTX product content, lower average selling prices, and a weaker-than-expected mix or penetration of new products. Another risk is a move by customers away from mirror-based displays to alternate in-vehicle display locations. Increased import and export tariffs could hurt sales and margins more than we currently project.**

- **Our 12-month target price of $26 is derived by applying a multiple of 15.6X our 2018 EPS estimate and 14.4X our 2019 projection, below GNTX’s five-year average forward P/E. We see slowing near-term growth, but we see trends supportive of increased Gentex content. We expect EPS accretion from the HomeLink acquisition, as well as from ongoing share repurchases.**

CORPORATE OVERVIEW. Headquartered in Zeeland, Michigan, Gentex Corporation is a supplier of automatic-dimming rearview mirrors and electronics to the automotive industry, dimmable aircraft windows for aviation markets, and fire protection products to the fire protection market. The company ships interior mirrors as well as flat, convex and aspheric sub-assemblies for exterior use. In 2017, automotive rearview mirrors and electronics accounted for 98% of the company’s net sales in 2017. GNTX sold 39.3 million mirrors in 2017, up 9% from 2016. With an approximately 93% market share in auto-dimming rearview mirrors in 2017 (up from 88% in 2013), GNTX is the dominant supplier of this part to the automotive industry.

The company’s breakdown of shipments by region in 2017 was: Europe (46%), Asia-Pacific (23%), and North America (31%). Gentex’s percentage of total shipments to the Asia-Pacific and Europe regions have been increasing over the last several years, while North America has been declining. Between 2007 and 2017, its Asia-Pacific market share has grown from 16% to 23%, while Europe has grown from 40% to 48%, and its North American shipments have dropped from 44% to 31% of total volumes. The company currently supplies mirrors and electronics modules for BMW, Daimler Group, Fiat Chrysler, Ford, Fuji Heavy, Geely/Volvo, General Motors, Honda, Hyundai/Kia, Jaguar/Land Rover, Mazda, Mitsubishi, Nissan, Opel, PSA Group, Renault, SAIC, Subaru, Suzuki, Tesla, Toyota, and Volkswagen.

GNTX’s line of fire protection products consists of approximately 55 different models of smoke alarms and smoke detectors, and more than 100 different models of signaling appliances. The company and PPG Aerospace work together to provide variably dimmable windows for the passenger compartment of Boeing’s 787 Dreamliner aircraft.

CORPORATE STRATEGY. The company seeks to expand revenues via new models, greater penetration of existing markets and adding exterior mirrors. It seeks to be first to market new technologies and improve its manufacturing capabilities. We expect the company to continue to expand in Europe and Asia and to add features for mirrors. We also see the company continuing to focus on research and development for new technologies.

MARKET PROFILE. Our fundamental outlook for the auto parts and equipment sub-industry for the next 12 months is positive, reflecting our expectation for rising global demand, led by China. We think Europe production will improve again in 2018, and currency swings will likely help reported results in U.S. dollars. We think profits will benefit from higher global vehicle production.

We see U.S. new light vehicle sales falling to 16.8 million in 2018, versus 2017’s 17.1 million [according to Ward’s Automotive Reports]. In addition, we expect sales growth in most other regions. Rising prosperity in emerging markets, led by China, will likely drive global demand growth. We think rising volume abroad will help corporate profits and cash flows.

Positive factors we see in the U.S. include rising employment, pent-up consumer and business demand and relatively easy access to credit for consumers. The average U.S. light vehicle age was 11.7 years in 2017, an industry record. Cost cutting should also help margins, and lower gasoline prices is a positive in our view. The strong dollar will likely hurt those with exposure to sales denominated in weaker currencies.

We forecast higher global vehicle production in 2018 with production trends varying by country. U.S. new light vehicle production will likely decrease, but Europe’s should climb. We project higher production in Asia, led by China, and we expect improved U.S. automotive replacement parts market demand

Many auto parts suppliers are increasing their revenues generated outside the U.S. Emerging markets are becoming more attractive to parts manufacturers due to lower labor costs for manufacturing and engineering and/or growing demand in local and regional markets. Over time, we expect domestic parts suppliers to increase penetration of import brands, which are shifting more of their production to the U.S.

FINANCIAL TRENDS. Gentex’s total revenues have increased from $1.54 billion in 2015 to $1.68 billion in 2016 and $1.79 billion in 2017, while its EPS has risen from $1.08 in 2015 to $1.19 in 2016 and $1.41 in 2017. The tax reform bill has produced a windfall of tax savings for Gentex, causing it to post an effective tax rate in the first six months of 2018 that was nearly half of the rate compared to the first half of 2017 (15.5% versus 29.2%). The reduction in income tax expense was the driver of 25% EPS growth in the first half of 2018 to $0.80, up from $0.64 in 2017, as revenues grew nearly 3% and gross profit was up 1%.

As of June 30, 2018, the company had $297 million of cash and equivalents, down from $570 million as of December 31, 2017. GNTX’s total debt of $23 million as of June 30, 2018 was down from $78 million at year-end 2017. Management said it expected to pay the remaining balance on its credit facility in the third quarter of 2018, leaving it with essentially no debt. Given its robust balance sheet and net cash position, we think Gentex is well-positioned to boost earnings through increased share repurchases and/or dividends, in addition to accretive acquisitions or organic growth projects.

Gentex currently returns cash to shareholders through dividends and share repurchases. The company currently pays a $0.44/share annualized dividend. In the first half of 2018, the company bought back 15.6 million shares of common stock at an average price of $22.36/share which was partially offset by the issuance of 4.2 million shares, resulting in a net decrease of 11.4 million shares. This activity leaves GNTX with 19.67 million shares of buyback capacity under the existing authorization as of June 30, 2018.

Sub-Industry Outlook

Our fundamental outlook for the auto parts and equipment sub-industry for the next 12 months is positive, reflecting our expectations for plateauing demand, but a favorable mix in the U.S. and rising demand abroad, including China. We think European production will improve again in 2018. We also think profits should benefit from international vehicle production. The initiation of import and export tariffs and a possible trade war remain a risk, but we ultimately expect a negotiated resolution.

We estimate 2018 U.S. light vehicle sales will soften 1.9% to 16.8 million units, down for a second consecutive year from 2016's record volume. For 2018, we expect gains in most other regions. Rising prosperity in emerging markets, led by China, will likely drive global demand growth and European demand should rise, partly offset by declines in some emerging markets. We think higher global volume will help corporate profits and cash flows. Currency swings will impact companies' profitability. Positive factors we see in the U.S. include widely-available access to consumer credit, high consumer confidence and employment, a strong stock market and relatively low and stable gas prices. The average vehicle is now about 11.5 years old, an industry record. A rebound in commodity prices could be a headwind for margins.

We forecast higher global vehicle production in 2018, with production trends varying by country. U.S. new light vehicle production will likely decrease, but Europe's should rise. We project higher production in Asia, led by China, and we expect improved U.S. automotive replacement parts market demand. We also expect global volume to rise in 2018.

Many auto parts suppliers are increasing their revenues generated outside the U.S. Emerging markets are becoming more attractive to parts manufacturers due to lower labor costs for manufacturing and engineering in addition to, or because of, growing demand in local and regional markets. Over time, we expect some domestic parts suppliers to increase penetration of import brands, which are shifting more of their production to the U.S.

Year to date through July 13, 2018, the S&P Auto Parts & Equipment Index was down 0.4% compared to a 5.0% rise for the S&P 1500 Index. In 2017, the S&P Auto Parts Equipment Index rose 30.1% compared to an 18.8% increase in the S&P 1500 Index.

/Efraim Levy, CFA
July 20, 2018
11:12 am ET... CFRA KEEPS BUY OPINION ON SHARES OF GENTEX CORPORATION [GNTX 23.41***]: In the short-term, we think tariff and trade issues may modestly hurt sales and gross margins and weigh on valuation. In the longer term, we see positive vehicle content trends aiding GNTX’s growth rate in international markets. We also see technology upgrades serving an evolving automotive market. Our 12-month target price of $26 is 15.6X our ’18 EPS estimate of $1.67 and 14.4X our ’19 forecast of $1.81, on historical and peer P/E analysis. GNTX posts Q2 EPS of $0.40 vs. $0.31, in line with our projection, but $0.01 below the S&P Capital IQ consensus estimate. Revenues were 3.0% lower than expected. The sales miss largely reflects weaker-than-expected North American production, including down time ripples from a supplier plant fire that hurt industry production by about one-percentage point. The company again outgrew industry production in its key markets. We expect revenues to improve on new products and increased industry vehicle production in the second half. /Efraim Levy, CFA

April 20, 2018
12:11 pm ET... CFRA KEEPS BUY OPINION ON SHARES OF GENTEX CORPORATION [GNTX 23.66***]: Our 12-month target price of $26 is 15.6X our ’18 EPS estimate of $1.67, on historical and peer P/E analysis. We raise our ’18 EPS projection by $0.09 to reflect a further reduction in expected tax rates and share count. We increase ’19’s EPS forecast by $0.05 to $1.81. We see positive vehicle content trends aiding GNTX’s growth rate in international markets. We also see technology upgrades serving an evolving automotive market. GNTX posts Q4 EPS of $0.33 (down $0.01), in line with the consensus estimate and $0.01 above our view, despite 2.4% lower-than-expected revenues. The sales shortfall was largely attributable to a supplier production issue that hurt revenues by about 2%, but has since been remedied. Still, the company grew faster than the weaker-than-expected industry production in its key markets. We expect revenues to improve on new products and increased industry vehicle production as the year progresses. /Efraim Levy, CFA

January 26, 2018
12:08 pm ET... CFRA RAISES OPINION ON SHARES OF GENTEX CORPORATION TO BUY FROM HOLD [GNTX 23.29****]: We raise our 12-month target by $6 to $26. This is 16.5X our ’18 EPS estimate of $1.58 [raised by $0.24], on historical and peer P/E analysis. We set ’19’s EPS forecast at $1.76. Tax reform should lower the company’s tax rate and we see favorable vehicle content trends aiding GNTX’s growth rate in international markets. We also see technology upgrades serving a changing automotive market. Including tax reform benefits of $0.13, GNTX posts Q4 EPS of $0.46 vs. $0.31, above the $0.32 consensus estimate. Operating margin comparisons were hurt by temporary elevated Q4 ’16 margins. /Efraim Levy, CFA

October 20, 2017
11:47 am ET... CFRA KEEPS HOLD OPINION ON SHARES OF GENTEX CORPORATION [GNTX 19.68****]: Our 12-month target of $20 is 14.9X our ’18 EPS estimate of $1.34 (cut $0.08), on historical and peer P/E analysis. We reduce our ’17 EPS forecast to $1.24 from $1.26. We see favorable vehicle content trends aiding GNTX’s growth rate in international markets, even as U.S. industry volume is restricted. GNTX posts Q3 EPS of $0.31 vs. $0.32, $0.01 above the S&P Capital IQ consensus estimate, even as it reported weaker-than-expected revenue growth in in the U.S. and a weaker overall mix. Operating margins were hurt by price cuts, unfavorable mix and a lack of operating leverage. /Efraim Levy, CFA

July 21, 2017
11:09 am ET... CFRA MAINTAINS HOLD OPINION ON SHARES OF GENTEX CORP. [GNTX 17.12***]: We reduce our 12-month target by $2 to $20, or 14.6X our ’18 EPS estimate of $1.37 (down $0.08), on historical and peer P/E analysis. We lower our ’17 EPS forecast from $1.31 to $1.26. We see favorable vehicle content trends aiding GNTX’s growth rate in international markets, even as U.S. industry volume declines. GNTX posts Q2 EPS of $0.31 vs. $0.30, $0.01 less than our estimate, hurt by slightly softer-than expected revenue growth and a weaker mix. Operating margins were hurt by price cuts and a lack of operating leverage. GNTX saw equity gains versus year-ago losses. /E. Levy-CFA

Note: Research notes reflect CFRA’s published opinions and analysis on the stock at the time the note was published. The note reflects the views of the equity analyst as of the date and time indicated in the note, and may not reflect CFRA’s current view on the company.
Forecasts are not reliable indicator of future performance.

Note: A company's earnings outlook plays a major part in any investment decision. S&P Global Market Intelligence organizes the earnings estimates of over 2,300 Wall Street analysts, and provides their consensus of earnings over the next two years, as well as how those earnings estimates have changed over time. Note that the information provided in relation to consensus estimates is not intended to predict actual results and should not be taken as a reliable indicator of future performance.

Note: For all tables, graphs and charts in this report that do not cite any reference or source, the source is S&P Global Market Intelligence.

Wall Street Consensus Opinion

HOLD

Wall Street Consensus vs. Performance

For fiscal year 2018, analysts estimate that GNTX will earn USD $1.67. For the 2nd quarter of fiscal year 2018, GNTX announced earnings per share of USD 0.40, representing 24% of the total revenue estimate. For fiscal year 2019, analysts estimate that GNTX's earnings per share will grow by 8% to USD $1.80.
Glossary

STARS
Since January 1, 1987, CFRA Equity and Fund Research Services, and its predecessor S&P Capital IQ Equity Research has ranked a universe of U.S. common stocks, ADRs [American Depositary Receipts], and ADSs [American Depositary Shares] based on a given equity's potential for future performance. Similarly, we have ranked Asian and European equities since June 30, 2002. Under proprietary STARS [Stock Appreciation Ranking System], equity analysts rank equities according to their individual forecast of an equity's future total return potential versus the expected total return of a relevant benchmark [e.g., a regional index (S&P Asia 50 Index, S&P Europe 350® Index or S&P 500® Index)], based on a 12-month time horizon. STARS was designed to meet the needs of investors looking to put their investment decisions in perspective. Data used to assist in determining the STARS ranking may be the result of the analyst's own models as well as internal proprietary models resulting from dynamic data inputs.

S&P Global Market Intelligence’s Quality Ranking
[also known as S&P Capital IQ Earnings & Dividend Rankings] – Growth and stability of earnings and dividends are deemed key elements in establishing S&P Global Market Intelligence’s earnings and dividend rankings for common stocks, which are designed to capsulize the nature of this record in a single symbol. It should be noted, however, that the process also takes into consideration certain adjustments and modifications deemed desirable in establishing such rankings. The final score for each stock is measured against a scoring matrix determined by analysis of the scores of a large and representative sample of stocks. The range of scores in the array of this sample has been aligned with the following ladder of rankings:

<table>
<thead>
<tr>
<th>A+</th>
<th>B+</th>
<th>A</th>
<th>B</th>
<th>A-</th>
<th>B-</th>
<th>NR</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

EPS Estimates
CFRA’s earnings per share (EPS) estimates reflect analyst projections of future EPS from continuing operations, and generally exclude various items that are viewed as special, non-recurring, or extraordinary. Also, EPS estimates reflect either forecasts of equity analysts; or, the consensus [average] EPS estimate, which are independently compiled by S&P Global Market Intelligence, a data provider to CFRA. Among the items typically excluded from EPS estimates are asset sale gains; impairment, restructuring or merger-related charges; legal and insurance settlements; in process research and development expenses; gains or losses on the extinguishment of debt; the cumulative effect of accounting changes; and earnings related to operations that have been classified by the company as discontinued. The inclusion of some items, such as stock option expense and recurring types of other charges, may vary, and depend on such factors as industry practice, analyst judgment, and the extent to which some types of data is disclosed by companies.

12-Month Target Price
The equity analyst's projection of the market price a given security will command 12 months hence, based on a combination of intrinsic, relative, and private market valuation metrics, including Fair Value.

CFRA Equity Research
CFRA Equity Research is produced and distributed by Accounting Research & Analytics, LLC d/b/a CFRA (“CFRA US”); together with its affiliates and subsidiaries, “CFRA”). Certain research is produced and distributed by CFRA MY Sdn Bhd [Company No. 683377-A] [formerly known as Standard & Poor’s Malaysia Sdn Bhd] (“CFRA Malaysia”). Certain research is distributed by CFRA UK Limited (“CFRA UK”). CFRA UK and CFRA Malaysia are wholly-owned subsidiaries of CFRA US.

Abbreviations Used in Equity Research Reports
CAGR - Compound Annual Growth Rate
CAPEX - Capital Expenditures
CY - Calendar Year
DCF - Discounted Cash Flow
DDM - Dividend Discount Model
EBIT - Earnings Before Interest and Taxes
EBITDA - Earnings Before Interest, Taxes, Depreciation & Amortization
EPS - Earnings Per Share
EV - Enterprise Value
FCF - Free Cash Flow
FFO - Funds From Operations
FY - Fiscal Year
P/E - Price/Earnings
P/NAV - Price to Net Asset Value PEG Ratio - P/E-to-Growth Ratio PV - Present Value
ROA - Return on Capital Employed ROIC - Return on Invested Capital
ROI - Return on Assets
SOTP - Sum-of-The-Parts
WACC - Weighted Average Cost of Capital

Dividends on American Depositary Receipts (ADRs) and American Depositary Shares (ADSs) are net of taxes [paid in the country of origin].

Qualitative Risk Assessment
Reflects an equity analyst’s view of a given company’s operational risk, or the risk of a firm’s ability to continue as an ongoing concern. The Qualitative Risk Assessment is a relative ranking to the U.S. STARS universe, and should be reflective of risk factors related to a company’s operations, as opposed to risk and volatility measures associated with share prices. For an ETF this reflects on a capitalization-weighted basis, the average qualitative risk assessment assigned to holdings of the fund.

STARS Ranking System and Definition:
★ ★ ★ ★ ★ 5-STARS [Strong Buy]:
Total return is expected to outperform the total return of a relevant benchmark, by a notable margin over the coming 12 months, with shares rising in price on an absolute basis.

★ ★ ★ ★ 4-STARS (Buy):
Total return is expected to outperform the total return of a relevant benchmark over the coming 12 months, with shares rising in price on an absolute basis.

★ ★ ★ 3-STARS (Hold):
Total return is expected to closely approximate the total return of a relevant benchmark over the coming 12 months, with shares generally rising in price on an absolute basis.

★ ★ ★ 2-STARS (Sell):
Total return is expected to underperform the total return of a relevant benchmark over the coming 12 months, and the share price is not anticipated to show a gain.

★ ★ ★ ★ 1-STARS [Strong Sell]:
Total return is expected to underperform the total return of a relevant benchmark by a notable margin over the coming 12 months, with shares falling in price on an absolute basis.

Relevant Benchmarks:
In North America, the relevant benchmark is the S&P 500 Index, in Europe and in Asia, the relevant benchmarks are the S&P Europe 350 Index and the S&P Asia 50 Index, respectively.

S&P GLOBAL™ is used under license. The owner of this trademark is S&P Global Inc. or its affiliates, which are not affiliated with CFRA Research or the author of this content. Stocks are ranked in accordance with the following ranking methodologies:

**STARS Stock Reports:**
Qualitative STARS recommendations are determined and assigned by equity analysts. For reports containing STARS recommendations refer to the Glossary section of the report for detailed methodology and the definition of STARS rankings.

**Quantitative Stock Reports:**
Quantitative recommendations are determined by ranking a universe of common stocks based on 5 measures or model categories: Valuation, Quality, Growth, Street Sentiment, and Price Momentum. In the U.S., a sixth sub-category for Financial Health will also be displayed. Percentile scores are used to compare each company to all other companies in the same universe for each model category. The five [six] model category scores are then weighted and rolled up into a single percentile ranking for that company. For reports containing qualitative recommendations refer to the Glossary section of the report for detailed methodology and the definition of Qualitative rankings.

**STARS Stock Reports and Quantitative Stock Reports:**
The methodologies used in STARS Stock Reports and Quantitative Stock Reports (collectively, the “Research Reports”) reflect different criteria, assumptions and analytical methods and may have differing recommendations. The methodologies and data used to generate the different types of Research Reports are believed by the author and distributor responsible and appropriate. Generally, CFRA does not generate reports with different ranking methodologies for the same issuer. However, in the event that different methodologies or data are used on the analysis of an issuer, the methodologies may lead to different views or recommendations on the issuer, which may at times result in contradicting views or recommendations of an issuer. CFRA reserves the right to alter, replace or vary models, methodologies or assumptions from time to time and without notice to clients.
